RE: Conditional Use Permit Application CUP16-0602-Spring Grove Properties LLC

SYNOPSIS

Barry D. Clarkson d/b/a Spring Grove Properties LLC is requesting a conditional use permit to operate a wedding venue on property located at 4414 Spring Grove Road in the Spout Spring community.

Specifics

Applicant: Barry Clarkson
Property Owner: Spring Grove Properties LLC
Current Use: Residential/Agricultural
Proposed Use: add Wedding Venue
Surrounding Uses: Sporadic Residential, Agricultural
Parcel Size: Approximately 123.13 acres, 1 acre in this use
Zoning: A-1, Agricultural
Surrounding Zoning: A-1, Agricultural
Tax Map Number(s): 37 (A) 1A

ANALYSIS

This property is located approximately 0.37 miles from Stonewall Road along Spring Grove Road in the Spout Spring Community. The property is currently used for residential and agricultural purposes. Mr. Clarkson would like to construct a building to hold weddings and special events. A "honeymoon suite" would be constructed on the opposite side of the lake. The facility would be rented mainly on the weekends. This facility is similar in use the Spring Grove B& B which is located approximately 0.75 miles (by road) east of this location.

The project is located in the Rural Preservation Area. The RPA areas encompass land with special natural characteristics that make their preservation in open space particularly important to the County's environmental health. These areas include active and passive farm land, stream or river areas, steep slopes, trails, forestland or other passive recreational areas. Economic Development and tourism goals and objectives are supported by the Comprehensive Plan.

Zoning around the area is predominantly agricultural. Several conditional use permits have been issued in the area throughout the years, including the Spring Grove B&B and multiple second dwellings; however no conditional use permits have been issued in this general area in approximately 14 years.

PROJECT IMPACTS

The property would have little development impact since the active farm would continue to operate during the week and the “venue” would be weekends mainly during the Spring to Fall season. This use will not add significantly to the traffic count overall, however, it could be limited times when traffic becomes problematic. This has not been an issue at the B&B which has a similar use. No environmental impacts are anticipated. Noise and air pollution would be negligible due to the isolated location of the facility.

Planning Considerations

The Appomattox County Zoning Ordinance lists the following standards by which a conditional use should be evaluated.

1. Will be harmonious with and in accordance with the general objectives or with any specific objective of Appomattox Comprehensive Plan and/or this chapter.
This use appears to be in line with the general objectives of the Comp Plan.
2. Will be designed, operated and maintained so as to be harmonious and appropriate with the existing or intended character of the general vicinity; and that such use will not change the essential character of the same area.
The proposed use is being designed to mitigate any impact to the greatest extent. The nearest residential use will be between a half and three-quarters of a mile from this location.
3. Will not be hazardous or disturbing to existing or future neighborhood uses.
The proposed use will not be hazardous or disturbing to the neighborhood.
4. Will be served adequately by essential public facilities and services such as highways, streets, police and fire protection, drainage structures, refuse disposal, water and sewer and schools; or that the persons or agencies responsible for the establishment of the proposed use shall be able to provide adequately any such services.
The impact on public facilities is negligible.
5. Will not create excessive additional requirements at public costs for public facilities and services; and will not be detrimental to the economic welfare of the community.
Use will not negatively impact public facilities or services. Use provides added benefit by providing an additional business to the community.
6. Will have vehicular approaches to the property which shall be so designed so as not to create any interference with traffic on surrounding public streets or roads.
Minimal traffic will be associated with this use. Entrance upgrades will be made as required.
7. Will not result in the destruction, loss or damage of a natural, scenic, or historic feature of major importance.
The proposed use will not negatively impact natural, scenic or historic features based on the sketch provided. The use will not be visible from the public right of way.

Planning Commission Action:

At the September meeting of the Planning Commission, the Planning Commission held a public hearing and considered the petition. No one spoke either for or against the petition.

The Planning Commission voted unanimously (with Conner abstaining) to recommend approval of the petition as presented.
